TEETHING

DESCRIPTION

Gingicalm has a formulation based on Aloe, Calendula, Chamomile, Honey and Xylitol. It forms a protective barrier on the gums helping to prevent redness and irritation, promoting oral cavity hygiene oral and giving relief and freshness

HOW TO USE

As needed, apply a layer of the product directly to the gums, massaging lightly with the tip of a fingertip. For a more refreshing effect, we recommend leaving the gel in the fridge for 30 minutes before application.

THERAPEUTIC INDICATIONS

- *Teething: biting urge; increased salivation; feeling of pain*
- *Barrier effect*
- *Oral cavity hygiene*
- *Giving relief and freshness*
